GOLD RESERVE ENTERS INTO IMPORTANT SOCIAL AND ENVIRONMENTAL PARTNERSHIP

Certain statements included herein, including those that express management's expectations or estimates of our future performance or concerning the Brisas Project, constitute "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by management at this time, are inherently subject to significant business, economic and competitive uncertainties and contingencies. We caution that such forward-looking statements involve known and unknown risks, uncertainties and other risks that may cause the actual financial results, performance, or achievements of Gold Reserve Inc. to be materially different from our estimated future results,

performance, or achievements expressed or implied by those forward-looking statements. Numerous factors could cause actual results to differ materially from those in the forward-looking statements, including without limitation, concentration of operations and assets in Venezuela; corruption and uncertain legal enforcement; requests for improper payments; regulatory, political and economic risks associated with Venezuelan operations (including changes in previously established legal regimes, rules or processes); the ability to obtain or maintain the necessary permits or additional funding for the development of the Brisas Project; in the event any key findings or assumptions previously determined by us or our experts in conjunction with our 2005 bankable feasibility study (as updated or modified from time to time) significantly differ or change as a result of actual results in our expected construction and production at the Brisas Project (including capital and operating cost estimates); risk that actual mineral reserves may vary considerably from estimates presently made; impact of currency, metal prices and metal production volatility; fluctuations in energy prices; changes in proposed development plans (including technology used); our dependence upon the abilities and continued participation of certain key employees; and risks normally incident to the operation and development of mining properties. This list is not exhaustive of the factors that may affect any of the Company's forward-looking statements. Investors are cautioned not to put undue reliance on forward-looking statements. All subsequent written and oral forward-looking statements attributable to the Company or persons acting on its behalf are expressly qualified in their entirety by this notice. The Company disclaims any intent or obligation to update publicly these forward-looking statements, whether as a result of new information, future events or otherwise.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

NR 07-14

GOLD RESERVE ENTERS INTO IMPORTANT SOCIAL AND ENVIRONMENTAL PARTNERSHIP

August 29, 2007 - Gold Reserve Inc. (TSX:GRZ – AMEX:GRZ) announced today that it has entered into a partnership with Conservation International (CI) to advance the Company's strong commitment to environmental and social responsibility. The partnership will involve preserving biodiversity in and around the Company's Brisas Project in Venezuela and support the development of best practice tools for integrating biodiversity information into the business decision making processes.

Compania Aurifera Brisas del Cuyuni C.A. (Brisas), the Venezuelan subsidiary of Gold Reserve, has also signed a Letter of Intent with CI Venezuela outlining commitments, whereby the two organizations will work together to institute programs pertaining to biodiversity and sustainable agro-forestry in the upper Cuyuni River basin located in the State of Bolivar in southeastern Venezuela near the Guyana border. This effort will include extensive biodiversity assessments and monitoring efforts to understand and protect the biodiversity of the Project area as well as a program of work aimed at empowering local communities to develop sustainable agro-forestry.

The Company has also finalized an agreement with CI to support the development of decision making tools and methodologies that guide companies such as Gold Reserve through a process by which they assess the ongoing environmental impacts and assess their biodiversity, take action to avoid, mitigate or offset this impact, and monitor their achievements. This support will facilitate the development of a biodiversity offset strategy for the Brisas Project in conjunction with the Business and Biodiversity Offset Program (BBOP) (more information on BBOP can be found at: www.forest-trends.org/biodiversityoffsetprogram).

"We are pleased to be working with CI," said Doug Belanger, president of Gold Reserve. "Our strong relationship with CI will empower our employees and provide them substantial experience while furthering the Company's commitment to the Equator Principles and responsible environmental stewardship."

About the organizations:

Conservation International (CI) is a nonprofit international organization which operates in 40 countries around the world and applies innovations in science, economics, policy and community participation to protect the Earth's richest regions of plant and animal diversity in the biodiversity hotspots, high-biodiversity wilderness areas as well as important marine regions around the globe. For further information see www.conservation.org

The Company

Gold Reserve Inc. is a Canadian company developing the Brisas gold copper project in Southeastern Venezuela. Brisas has NI-43-101 reserves of 485 million tonnes of ore grading 0.67 grams per tonne gold and 0.13% copper containing 10.4 million ounces of gold and 1.3 billion pounds of copper (using a revenue cutoff grade of US \$3.04 per tonne and a gold price of US \$400 and a copper price of US \$1.15 per pound). The mine plan anticipates using conventional truck and shovel mining methods with the processing of ore at full production of 70,000 tonnes per day, yielding an average annual production of 456,000 ounces of gold and 60 million pounds of copper for a mine life of 18.5 years. Using copper as a byproduct, operating costs are expected to be US \$126 per ounce (using US \$1.80 copper). The Qualified Personnel for the NI 43-101 Report are Susan Poos of Marston and Marston, Inc. and Richard Addison and Richard Lambert of Pincock, Allen and Holt, all registered professional engineers.

For further information please see our update to the Company's NI-43-101 report at our website at www.goldreserveinc.com, investor relations, SEDAR Filings.

Forward-Looking Statements

Certain statements included herein, including those that express management's expectations or estimates of our future performance concerning the Brisas Project or the Choco 5 Exploration Project, constitute "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by management at this time, are inherently subject to significant business, economic and competitive uncertainties and contingencies. We caution that such forward-looking statements involve known and unknown risks, uncertainties and other risks that may cause the actual financial results, performance, or achievements of Gold Reserve Inc. to be materially different from our estimated future results, performance, or achievements expressed or implied by those forward-looking statements. Numerous factors could cause actual results to differ materially from those in the forward-looking statements, including without limitation, concentration of operations and assets in Venezuela; corruption and uncertain legal enforcement; requests for improper payments; regulatory, political and economic risks associated with Venezuelan operations (including changes in previously established legal regimes, rules or processes); the ability to obtain or maintain the necessary permits or additional

funding for the development of the Brisas Project; in the event any key findings or assumptions previously determined by us or our experts in conjunction with our 2005 bankable feasibility study (as updated or modified from time to time) significantly differ or change as a result of actual results in our expected construction and production at the Brisas Project (including capital and operating cost estimates); risk that actual mineral reserves may vary considerably from estimates presently made; impact of currency, metal prices and metal production volatility; fluctuations in energy prices; changes in proposed development plans (including technology used); our dependence upon the abilities and continued participation of certain key employees; and risks normally incident to the operation and development of mining properties. This list is not exhaustive of the factors that may affect any of the Company's forward-looking statements. Investors are cautioned not to put undue reliance on forward-looking statements. All subsequent written and oral forward-looking statements attributable to the Company or persons acting on its behalf are expressly qualified in their entirety by this notice. The Company disclaims any intent or obligation to update publicly these forward-looking statements, whether as a result of new information, future events or otherwise.
